

Q ANALYSTS

GROUND TRUTH DATA SERVICES

QUALITY DATA FOR ARTIFICIAL INTELLIGENCE & MACHINE LEARNING

Q Analysts offers a unique end-to-end suite of Ground Truth Data Services for AI and ML product development from strategy to capture to annotation & tagging all done in-house.

Humans: Q Analysts has deep experience in capturing granular behavioural data to tune the user experience for selective demographics, age groups, geographical locations and cultures.

Objects: Our solutions team develops innovative solutions for capturing ground truth data for various objects including documents, media and an array of everyday and unique items.

Scenarios: Our team has developed innovative solutions for simulating real world scenarios that may include a combination of spaces, human actors, real world objects and locations.

Spaces: We are experts in developing international initiatives for capture of high-resolution spatial data in homes, offices, and public spaces.

Speech: We have extensive experience running initiatives of varied scale to capture accents, dialects, speech patterns and other speech behaviors for NLG, NLP and speech recognition applications.

The Q Analysts Difference:

Industry Leader - Proven Expertise - Dedicated Facilities - Top Tech Clients
